USE OF THESIS

The Use of Thesis statement is not included in this version of the thesis.
Abstract

This dissertation aims to bring to light, and to categorise, the music for trumpet and cornetto contained in the great manuscript collection at Uppsala University, the so-called Dübén collection. The dissertation will divide into four clear sections. After an introductory chapter on the Dübén collection itself, chapter two will give an overview of the trumpet and cornetto music contained therein. This chapter - in addition to identifying composers, works and typical genres - will also centre round issues of musical style and of the etymology of instruments. Chapter three will present two unpublished works in a modern critical edition, complete with introduction and commentary. A handlist of the trumpet and cornetto music available within the collection then follows.
Declaration

I certify that this thesis does not, to the best of my knowledge and belief:

(i) incorporate without acknowledgement and material previously submitted for a degree or diploma in any institution of higher education;

(ii) contain any material previously published or written by another person except where due reference is made in the text; or

(iii) contain any defamatory material.

I also grant permission for the Library at Edith Cowan University to make duplicate copies of my thesis as required.

Chapter 1

The Düben Collection

The Düben Collection, housed at Uppsala University in Sweden, is one of Europe’s largest and most important collections of manuscript music. The collection was assembled and subsequently donated to the university by the Düben family in 1732.¹ Until fairly recently access to this collection was difficult, and things certainly were not helped by the less-than-satisfactory catalogues of the collection.² Since 2006 however, this situation has dramatically reversed, thanks to the Düben Database Project. Undoubtedly one of the success stories relating to computing in the humanities, a team of researchers from the University of Uppsala joined forces with the noted Buxtehude scholar, Kerala Snyder from the Eastman School of Music in the USA, and together laid the foundations for this online catalogue of the Düben collection. Not only are its records fully searchable via a relational database, the interface provides—and this is its most significant feature—full access to facsimile reproductions of the actual manuscripts themselves. The music in this collection, due to its relative geographical isolation, has been more talked about rather than studied, however all is now set to change, thanks to the Düben Collection Database Catalogue. Studying original scores and parts can reveal intricate details of common practices and styles, and preliminary research into the scores containing music for trumpet and cornetto has shown that there is much to say that is both original and interesting.

The music contained in the Düben collection consists largely, though not exclusively, of manuscript parts of seventeenth-century concerted North German church music. Due to the fact that most of this repertoire remains to be ‘scored up’ and edited, research

¹ The Düben Collection website http://www.musik.uu.se/duben/Duben.php and Grove Music Online have detailed information both on the history of the project and also on the Düben family.
into this corpus of materials is almost certain to produce new information. My editions (chapter three) are of works hitherto unstudied and unpublished, and through these I aim to not only unearth music of artistic worth, but also to relate such music to the broader field of performance practice in relation to seventeenth century music for trumpet and cornetto.

The programme of musicological research conducted using the Düben collection is extensive, and has resulted in a sizeable corpus of secondary literature (especially in relation to Buxtehude). The Düben Collection is one of the largest repositories of Buxtehude’s manuscripts. Before being uploaded to the Internet, the Düben Collection had already offered research into 17th century church music and the development of the cantata. In addition, a number of dissertations have been written on music found in the Düben Collection, such as Sara Cathcart Ruhle’s dissertation An Anonymous Seventeenth-Century German Oratorio In The Düben Collection.

The men of the Düben family served as Hofkapellmeister over a span of eighty years at the Royal Swedish Court, and the Düben collection is thought to represent what remains of the court’s music library, from the reign of Queen Christina (beginning 1644) to Charles XII (ending 1718). The collection was first catalogued in the 1880s, however a complete published catalogue has had to wait until now.

The Düben Collection contains manuscripts mainly from North and Central Germany, Italy, the Netherlands and the Hanseatic cities. There are several prolific composers

---

4 Robert Inar Holst, "Toward a Stylistic History of the North German "Cantata" In the Second Half of the Seventeenth Century" (9542720, The University of Chicago, 1995).
within this collection such as Dietrich Buxtehude, Christoph Bernhard, Samuel Capricornus, Kaspar Förster Jr., Christian Geist and Augustin Pfleger. The works of these composers can help define the history of late 17th century Protestant church music before the development of the Church cantata in the 18th century. A large proportion of manuscripts are vocal works (80%), with the remaining 20% being instrumental pieces.

---

Chapter 2

An overview of the trumpet and cornetto music in the Düben Collection

The composers in the handlist

The composers represented in the Düben Collection are predominantly German, Austrian or Italian. There are eighty-three works written by forty-five identified composers and an additional eighteen works whose authorship is unknown. The works that have known (or approximate) copy dates are centred around the last quarter of the 17th Century.

Most composers in this catalogue were born around the mid 1600 with many from neighbouring regions in Central and Northern Germany. By examining the cities in which the composers were most prolific, certain similarities between compositional styles become apparent. This helps in studying the works contained therein as one can often relate the style of a little-known composer to that of a more distinguished one. Composers can generally be broken up into two categories. Those from Central Europe all exhibit compositional styles in line with Germanic traditions, influenced heavily by the art of fugue and counterpoint. In these works the organ and voice were favoured, particularly in music from Germany and Holland. Sonatas and concertos represent the "Italian" tradition, and composers such as Vincenzo Albrici and Marco Gioseppe Peranda are notable exponents of this style. The circulation of printed and manuscript Italian church music, as well as a significant amount of itinerant travel, resulted in composers sharing ideas and techniques, which ultimately helped to bring

11 Michael Sartorius "Baroque Music Defined"
14 Mary E. Frandsen, "The Sacred Concerto in Dresden, Ca. 1660-1680" (1997).
the Germanic and Italianate styles together.\textsuperscript{15} This not only advanced composers' own styles of composition but also lead to the development of additional means of expression.\textsuperscript{16} Italian music written in the \textit{seconda prattica}—although known in the large cities of Germany and Poland—only started to spread slowly through North Germany from about the mid 17\textsuperscript{th} Century.\textsuperscript{17} Schütz was a great advocate for the spread of the new style through Germany, with Dresden becoming a hub for this type of interaction and exchange.\textsuperscript{18} This new style was picked up by many minor composers and soon began to be integrated with their own styles of composition.

Within this collected corpus of trumpet and cornetto music, there looms a large proportion of composers from North and Central Germany. In studying their compositions many similar features relating to form, style, structure and compositional techniques appear. Within the handlist of trumpet and cornetto music however, one composer lies outside the close geographical proximity of the others. Benjamin Rogers, an English organist, singer and cornettist, travelled to Sweden during his lifetime, often sending manuscripts to Leopold I who performed them at court.\textsuperscript{19} This no doubt would explain why his compositions have been found in this collection even though he lived and died in Britain.

The handlist explained

The main focus of this research is to uncover manuscripts in the Düben collection relating to the trumpet or cornetto, and to catalogue them in a way so as to facilitate future studies in the field.

The Düben Collection consists largely of North German concerted church music, and contains a vast treasure of music. From this collection a handlist of works featuring either trumpet and/or cornetto has been compiled. Each entry provides information on the composer, title, scoring and copyist details of the work in question, as well as a comments section, which aims to list other interesting information about the music.

A study into the etymology of part names for the trumpet and cornetto was carried out and this has turned up some very interesting information. Even though 'clarino' was used to describe a high-register instrument it was quite commonplace for composers to have intended the part to be played by the trumpet. There are many different names used on the parts to define the use of the trumpet and cornetto, including clarino, tromba, klarin or cornet, cornetto and their diminutives.

The baroque trumpet was a metal pipe wound in a long oval shape without finger holes or keys to assist accuracy of playing. Two sections, the lead pipe and bell are held in place by large knops or pommels. These looked like large balls, and gave a place on which to grasp the instrument. A bound cork block was sometimes wedged between the two loops of tubing to add rigidity and could be also used to hold the instrument.

The baroque trumpet was able to facilitate a principale register, which employs the lower harmonics of the instrument, whilst still being able to adorn the upper register.

24 John Foster, The Natural Trumpet and other related instruments. 17
The cornetto was popular in medieval, renaissance and baroque music. Fashioned from a block of wood it was carved into a curved shaped with a conical bore. It uses a cup-shaped mouthpiece and has holes in the body of the instrument played in a way much like a recorder.\(^ {25} \) The cornettino is the descant version of the cornetto.\(^ {26} \) It would be possible for today's modern trumpet to play the music written for the cornetto and cornettino. However in the Baroque period the cornetto was an instrument in its own right. The question can be asked as to whether the trumpet was thought to be equivalent to the cornetto within an ensemble during the Baroque period.

Three Baroque Trumpets

Three Cornettos

http://www.absoluteastronomy.com/topics/Cornett

\(^ {25} \) C. Baines Anthony and Dickey Bruce, "Cornett," *Grove Music Online.*

\(^ {26} \) Michael Kennedy, "Cornett," *The Oxford Dictionary of Music.*
Sixty-six pieces within this handlist have trumpet and cornetto parts available online. Most specify parts written for either trumpet or cornetto. 12 specify just Cornetto; 14 – Cornettino; 7 – Tromba; 8 – Trombetta and 12 – Clarino. One score states the use of cornetto however on the parts only violin appears. Some of the pieces include parts that have been scored for trumpet or another high register instrument. Two scores appear for violin ð cornettino; one – violin o cornetto; one – viol e trombett; one – violin e trompa and one work for cornetto vel flaut. One work includes *klarin vel cornetto* parts and cornetto vel violino parts.

There are a few pieces in the handlist where more than one type of name was used. A few pieces include parts for trumpet as well as cornetto (or derivatives of the name). One piece each out of the sixty-six have parts allocated as such; Cornetto and Cornettino; Cornetto and Trombetta; Clarino and Cornettino; Cornetto and Piffaro ð Cornetto. There is one work that suggests trumpet and cornetto were interchangeable: Crato Bütner’s *Froloket mit Händen*. The parts are written for *Trombetta o Cornetto*, which is quite interesting to note, as they are quite different instruments. By studying the trumpet parts side by side with the cornetto parts, similarities in compositional style and techniques can be seen. The almost identical nature of trumpet and cornetto parts adds weight to the argument that they were interchangeable within the ensemble.

Most parts in the handlist have no key signature, nor do they say what key the trumpet or cornetto is in. It could be that most are in the key of C major, but usually, for the trumpet, crooks were added to adjust the length of the instrument bringing it into the correct key. Unlike the cornetto, the baroque trumpet does not have any holes or

---

keys to assist in changing of pitches. This adding of crooks affords the transposition of the harmonic series from one key to another. This provides the ability to continue playing the natural harmonics of the instrument with minimal lipping of notes incurred, producing a more in tune and full sound.\textsuperscript{28} The most common notes seen throughout all parts are $c^{\#}$, $e''$, $f'$, $g''$ and $a''$, with many $F\#$, $C\#$ and $Bb$ accidentals. The accidentals used are easy enough to lip on the natural trumpet and allow the music to modulate to the dominant and subdominant keys.

Genres and styles

Works in this handlist separate into instrumental and vocal works. Sonatellas, suites, sonatas, marches, airs and sinfonias make up the instrumental music. The vocal music is made up of concertos, motets and masses.

The Dübben Collection houses many sacred concerted works from north and central Germany. Sacred concerted music, also known as \textit{Geistliches Konzert}, are multi-sectional vocal compositions setting biblical texts.\textsuperscript{29} Different genres can be assigned the sacred concerted label, such as motets, concertos and masses.\textsuperscript{30} The 17\textsuperscript{th}-century German motet can be divided into three different styles. The \textit{Liedmotette} which was in a "free, lightly imitative style...with occasional cantus firmus elements",\textsuperscript{31} the chorale motet which was in a contrapuntal cantus firmus style and the \textit{Spruchmotette} or the 'text-motet'.\textsuperscript{32} This last style sets biblical texts to music utilising more syllabic forms to deliver large amounts of texts within a shorter time frame. This style was quite popular.

\textsuperscript{28} Plank and Tarr, \textit{The Trumpet}, 87, 89; Crispian Steel-Perkins, \textit{Trumpet} (London: Kahn & Averill, 2001) 23
\textsuperscript{29} "Geistliches Konzert," \textit{Grove Music Online}.
\textsuperscript{30} H. Sanders Ernest et al., "Motet," \textit{Grove Music Online}.
\textsuperscript{31} Ibid.
\textsuperscript{32} Ibid.
as there was much demand for music incorporating verses from the Gospels and other parts of the Bible.\textsuperscript{33}

In this collection there are many examples of motets of the \textit{Spruchmotette} genre. Of the specified motets, five are written in Latin, two in German and one in Swedish. Most are written for feasts associated with the church's liturgical year.

The concerto in the early Seventeenth Century was used to describe instrumental music as well as 'vocal music accompanied by instruments.'\textsuperscript{34} These pieces were more often than not also affiliated with church music. The sacred concerto was popularised by catholic as well as protestant composers.\textsuperscript{35} This was very important, as such compositions began a trend for composers to write in the vernacular, and this in turn allowed a church-going public to enter into a more meaningful relationship with texts they could easily understand.

Although there are many composers from Germany represented in the handlist, only concertos written in Latin appear. This is not to say that texts in the German language do not appear (in fact there are many large-scale settings of songs and hymns with German texts). Amongst the vocal music, around 65% percent have texts in Latin, 25% are in German and 10% are in Swedish.

Chapter 3:

An edition of two pieces for trumpet or cornetto from the Dübén Collection

Editorial methods

This edition is to serve the performer and the scholar. All part discrepancies and editorial changes are noted in brackets in the score or recorded in the critical commentary. The sources used for both editions are those that have been uploaded to the Dübén Collection Database Catalogue held in the great manuscript archive at the Uppsala University, Sweden. Notation in these sources is similar to modern conventions. Tempo Indications do not always appear in every instrumental part of the sources. Wherever tempo indications are missing from one part, the indications written on other parts have been taken to apply to the whole ensemble.

The sources display modern barring practices but occasionally there are missing barlines. Where these barlines are not present they have been inserted into the score to follow modern notational practices. Bars in the source are also commonly split over two lines. There seems no regard for keeping whole bars together on one line.

Accidentals in this edition follow modern notational practices, where the accidental applies for the whole bar unless otherwise indicated. The source parts display flats cancelling out sharps and vice versa. In the edition, natural signs are used to show the cancellation of flats and sharps within a bar.

The Basso Continuo parts exhibit only sparse figuring. The figures in the source appear above the note applied to, whereas this edition the figures appear below the note. All additional editorial bass figures are given in brackets.
An anonymous sonata for Two Cornetti and Basso Continuo

Introduction

The Düben Collection preserves an anonymous sonata for two cornetti and basso continuo. There are three parts marked Cornetto 1.mo (Primo), Cornetto 2.do (secondo) and Basso Continuo. The Basso Continuo part also has the title page: Sonata | a | 2. Cornetto | Con | Basso Continuo. The lower half of the title page contains two additional elements. Appearing first is an eight bar incipit of the first cornetto part. At the lower right hand corner of the page is the following indication of copyist, and presumably, the date of copying: Andreas Düben | di 17 octobris Anno 1692.

The parts are written in the hand of Andreas Düben, and like other exemplars of his work he copies clear parts, however these are not devoid of mistakes. The pages are ruled with a rastrum and there are eleven staves to each page. The symbol for the f clef is unusual. The usual custus signs are to be found at the end of each line, and section breaks are marked with double bar lines or the following sign :||:. For most of the way the source displays regular barring. Bar lines are indicated by short vertical dashes in the score. It is difficult to tell if these were written at the time of copying or added at a later date by a performer. In the source there are some discrepancies in the parts with regards to meter signs. At the opening, Cornetto 1 and Cornetto 2 correctly give tempus imperfectum alla breve, whereas the Basso Continuo part incorrectly gives tempus perfectum alla breve. In the first cornetto part, coming out of the sesquialtera N.B section at the end of the piece going into the last section, the copyist initially gives a

N.B Sesquialtera is the term used to describe the ratio of 3:2, often used in early music.
tempus imperfectum mensuration sign only to nullify this in the following line with a tempus imperfectum alla breve. The parts are designed for performance as the ends of each page have the command verte cito. The Basso Continuo part is sparsely figured. The first line contains 90% of the figures with the very last line providing the last 10%. The rest of the part is unfigured.

This is a typical multi-sectional sonata with many individual sections rather than three separate movements. It is quite typical of an early sonata from the Baroque period. In all, the sonata divides into eight smaller sections each taking its own point of imitation and developing it. These sections represented by bar numbers divide into M.1–M.11, M.12–M.21, M.22–M.27, M.28–M.40, M.41–M.53, M.54–M.76, M.77–M.109, M.110–M.115. Taken in small sections the writing seems to represent that of some of the great composers of that time, however the piece as a whole lacks continuity and strength. Confirmation of a weak compositional technique is evident in the sections M.28–M.40 and M.41–M.53. The latter section is a complete repetition in the cornetto 2.do part of the first cornetto solo of section M.28-40.

Critical commentary

Critical notes identify the errors in the parts. Pitches are identified according to the system that middle C = c'. The following abbreviations have been used. Cornetto = Cnto; Basso Continuo = B.C; Bar measures = M.

*Anonymous Sonata for Two Cornetti and Basso Continuo*

M.7, Cnto. 2, notes 1, 2, 3, 4 originally written as semiquavers and changed to quavers.

M.10, Cnto.2, note 1, minim c"", note 3, crotchet b', note 4, crotchet a'. M.19 corresponds to the third line in the source, B.C, copyist incorrectly gives a g clef instead of an f clef.

M.61, B.C, note 2 given as a quaver in source. M. 65, Cnto. 1, note 3 g' written with a' correction underneath.

M.92, Cnto. 1, note 1 dot missing. M.99, Cnto. 1, note 1, source gives two tied minims. M. 104, Cnto 2, note 1, accidental written in above the stave in a different ink [perhaps a later addition]. M.109, Cnto. 1, note 1 unclear d" or e". M.110, Cnto. 1, time sig. C but then becomes cut common.

M.110, all parts beginning repeat sign with no end repeat sign after this. M.111, Cnto. 1, note 16, source incorrectly gives f"#. M.115, all parts, note 1, ornamental final note.
Clemens Thieme Sonata a 8

2 Violini, 2 Trombetti, 4 Viole de Braccio and Bassus Continuus

Introduction

There is little written about German-born composer and instrumentalist Clemens Thieme. He was born in Grossdittmannsdorf, a small town just north of Dresden on September 7, 1631, and studied music as a young child with Phillip Stolle. From the age of eleven he was nurtured and looked after by Heinrich Schütz, who helped him gain regular work in many court orchestras. After returning to Dresden from a stint as a boy chorister in the Copenhagen court, he joined the Elector of Saxony's Kapelle in Dresden in 1651 through the recommendation of Schütz. Once again through the influence of Schütz, Clemens Thieme was able to obtain a position in the Kapelle at Zeitz, where he advanced to being the concertmaster.36 Thieme is thought to have penned around one hundred compositions however none were published during his lifetime. It is no surprise from Thieme's upbringing to see small sections of his writing style imitate that of Schütz. Though displaying some traditions of contrapuntal writing he also delves into the 'expressive Italianate manner'37 that Schütz was recognised for. Clemens Thieme lived a very short life passing away at age 37 on March 27, 1668 in Zeitz.38

In the Düben Catalogue the composer is listed as Clemens Thieme, however on all the manuscript parts an alternative spelling of the name appears. It is written as Clement Thime, which, apparently, is a common alternative.

36 Buch Hans-Joachim, "Thieme, Clemens," Grove Music Online.
37 Ibid.
38 Ibid.
The Düben Collection preserves a Sonata for Two Trombetti, Two Violins, 4 Viole di Braccio and Basso Continuo composed by Clemens Thieme. There are 10 parts marked Trombetta I, Trombetta 2, Violino I., Violino 2.do (secondo), Viola I., Viola 2.da (secondo), Viola 3.tia, Viola 4.ta, Bassus Continuus and Continuo. The Continuo and Violin 2.do parts have cover pages. The Continuo cover pages reads: Sonata ab. 8 | 2 Violini 2 Trombetti e 4 viole | di Braccio | di | Sig: Clement Thime. An additional element in the centre of the page appears as an incipit of the first 6 bars of the Viola I. part. The violin 2 part appears on the verso side of another cover page. This pages reads: Sonata ab. 8 | 2 Violini 2 Trombetti e 4 viol | di Braccio | di | Sig: Clement Thime. No additional information appears on the page.

The parts are written in the hand of P2 and although copied very clearly are not without mistakes. The pages are ruled with a rastrum and there are 8 lines on every page except Trombetta 2 page 2, which has 9, Viola 1 page 1, which has 7 and Viola 4 page 2, which has 4.

The viola 1 and 2 parts are written in the soprano clefs, the viola 3 in the alto clef and the viola 4 in tenor clef. The symbol for the f clef is unusual. The usual custus signs can be found at the ends of each line with section breaks marked by ;||: The parts display very clear barring, however a few bars appear to be in a different ink and may have been added at a later date. There are discrepancies relating to the tempo markings on the parts. Viola 1, 2, 3, 4 and Bassus Continuus have an Adagio indication in bar 1 all other parts are missing this. At the return to tempus imperfectum after the

---

39 Most copyists are anonymous. In this instance, P2 is the letter/number reference assigned by the compilers of the Düben Database catalogue for all manuscripts in this hand.
second *sesquialtera* section, a marking of *Adagio* appears once again only on the Trombetta 1, 2 and Violin 1 parts. Twelve bars into this section a marking of *Allegro* appears in the Bassus Continuus part only. The basso continuo is partially figured. The continuo part has figures appearing on the first four lines and the last line of the piece with the rest unfigured. The Bassus Continuus and Continuo parts are identical but with discrepancies in bass figuring.

In this score Viola 1 and 2 have been changed to G clef and Viola 3 and 4 changed to Alto clef.

Appendix

A handlist of trumpet and cornetto music found in the Düben Collection.

The Düben Collection contains a wealth of music for the trumpet and cornetto and the handlist that makes up this chapter attempts to describe this music in as concise a form as possible. Entries are modelled on the catalogue in Jane Bernstein’s *Music Printing in Renaissance Venice: The Scotto Press (1539-1572)*. Information is gleaned from the Düben records themselves (appearing as text fields on the database) and from my own examination of the facsimile parts. Bernstein’s model is a coherent way of cataloguing and clearly gives defined sections to where specific points of information need to be included.

This chapter presents a catalogue of works in the Düben collection employing parts for either trumpet and/or cornetto. Musical incipits are provided for each work in addition to various other details (explained below). The catalogue is arranged alphabetically by composer and lists 101 works. Each record follows the following format:

1. The reference to the record in the Düben Database Catalogue, instrumental music is signified by the prefix imhs and vocal music by vmhs.
2. The composer of the work. Dates are taken from new grove.
3. Title of the work and copy date if known
4. Scoring
5. Format, eg. Tablature, Scores, Parts.
6. Link to work page in the online Düben Database Collection.
7. Copyist. Refer to Düben Database for more information.
8. Language of text.

Düben Catalogue Number: vmhs 047:004

Albrici, Vincenzo. 1631-1696

*Amo te Laudo te o mi care Domine.*

Scored for 2S 2cntino fag bc (org, vlne, hpcd)

Notation in parts – 8 parts found online

http://www.musik.uu.se/Düben/presentationSource.php?Select_Dnr=10

Main Hand: K1

Language: Latin

Comments:

The cornettino parts begin the sinfonia before vocal parts enter with the cantus. Quite florid writing in the high clarino register. First and second parts play together in transposed canonical form. Free use of chromatic intervals. Imitation prominent between parts. Handwriting clear and cleanly set out.

#2.

Düben Catalogue Number: vmhs 082:002

Albrici, Vincenzo. 1631-1696

*Amo te Laudo te o mi care Domine*

Scored for 2S 2cntino fag bc (hpcd)

Notation in Tablature – 0 parts found online

Language: Latin
#3.

Düben Catalogue Number: vmhs 001:004
Albrici, Vincenzo. 1631-1696
Benedicte Domine Jesu Christe
Scored for 2S B cnto/vl fag/vg bc (org)
Notation in parts – 8 parts found online

http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=14

Main Hand: GD
Language: Latin
Comments:

Full title mentions two violin/cornetto parts. One is missing.
The cornetto part opens with a rhetorical quasi fanfare type motif making use of semiquaver motifs. Upon the vocal parts entering the cornetto parts assume an accompanying role—still in the upper register—returning to the opening material for the final few bars.

#4.

Düben Catalogue Number: vmhs 081:054

Albrici, Vincenzo. 1631-1696  
*Sonata a 5*  
Scored for 2vl 2trba fag bc  
Notation in parts – 8 parts found online  
http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=2067  
Main hand: GD  
Comments:  
Trombetta parts – there exist two exemplars of the trombetta 1 part. Fanfare opening with semiquaver runs in sequenced patterns in common time. The tripla section employs more of a lyrical melody in the trombetta part. First and second trombetta parts are antiphonal and pass the melody between each other until they become canonic and the second trombetta mimicks the first part. They join back together working in harmony in the final section of the piece.  
Trombetta 1 exemplar 1 is missing the ending of the work.

![Trombetta 1 and Trombetta 2](image)
#7.

Scored for 2S A T B 2cntino bc
Notation in parts – 8 parts found online
http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=801
Main Hand: “Fuxio”
Language: Latin
Comments:
For the original feast of S. Barbara; a missa brevis containing Kyrie and Gloria only. Cornettino parts are mainly stepwise runs or broken chords. Prominent use of semiquavers with florid melodies. With there being no other instruments beside the continuo, the cornettino parts take on the role of the violin adding melodic gestures imitating that of the voice.

Scored for 2ob 2tr b
Notation in parts – 5 parts found online
http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=2553

Main Hand: H457
Comments:

Original genre is a march. March like rhythms used in a two–four time signature. An anacrusis is used to introduce the opening fanfare or march theme. Tromba parts are quite contained and do not have florid melismatic passages. First part written in the upper part of the stave and the second part employs the *principale* register of the instrument.

Comments:
Original genre: Sonata
Clarino parts written in upper part of the treble register. Start in canon with each other. Beginning and end sections employ semiquaver movement and the middle section uses minimis and crotchets. The cornettino parts follow this note length pattern in sections but the opening and end sections have more florid and virtuosic writing. Cornettino parts in stepwise movements but also employing a few arpeggios. Can be seen that the cornettino parts more important and feature as a solo that than clarino parts.

Comments:
Original genre is a sonata
Trombetta parts begin with a short canonic introduction followed by chordal semiquaver arpeggios in harmony. A few discrepancies in rhythmic unison between parts; first part having a dotted quaver–semiquaver pattern with the second part having two quavers. Frequent use of semiquaver and quavers rhythms built on the chords of C major using an F# to create the dominant chord. Both parts mainly written in the upper part of the treble stave only venturing down to the lower principale register once or twice for cadential endings and a two bar adagio mid piece.

http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=1638

Main Hand: Not specified

Language: Latin

Comments:

Cornetto parts begin with quaver movement. The second section uses minims and semibreves with the final section employing semiquaver passages. The handwriting is quite italicized and proves for some difficulty in identifying correct notes. There is a crossed out bar mid page in the first cornetto part with the corrected version appearing directly after. This score includes specified dynamics. In the semiquaver section, forte and piano are written to create a call and response effect every half bar. Semiquavers are written in descending sequences with the second part offering the harmony underneath the first part. The first cornetto part is written in the upper soprano register with the second part written in the middle of the register. The Piffaro o Cornetto part is not as florid as the other two parts. Mostly using crotchet and some quaver movement. Written in the middle register of the alto stave.

*Laudabo nomen Dei cum cantico* (1670-74)
Scored for 2T B 2cntino fag bc
Notation in parts – 8 parts found online
http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=1895
Main Hand: H17
Language: Latin
Comments:
Two exemplars of the bc part; one unfigured. Opening sinfonia consists of much semiquaver movement and is quite florid and intricate. First cornettino part employs the upper to high range of the treble stave. Second cornettino part uses the upper register of the stave. The second part is somewhat independent from the first with overlapping motifs. Both parts play the final refrain of the hymn using longer divisions of the beat still in the same registers and continuing stepwise movement.

*Siehe wie fein und lieblich ist* (1680)
Scored for SAT B 2vl 2cntino bc(org)
Notation in parts – 9 parts found online
Main Hand: GD, Sthlm.
Language: German
Comments:
Original genre is a motetto.
Cornettino parts mostly use crotchet and quaver divisions with a few instances of semiquavers. First and second parts mostly in harmony throughout but a few times the second part becomes more polyphonic in texture taking on more melodic figures and canonic lines.

*Sonata a 2*
Scored for 2cnto bc
Notation in parts – 3 parts found online
http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=2365
Main Hand: AD
Original genre is a sonata.
Comments:
Copy dated: A.Dübén 17 October 1692
Cornetto parts are both quite intricate, florid and virtuosic. Cornetto parts are full of semiquaver movement mostly in stepwise motion using accidentals to bring it into D major.
Written in the upper to high register of the treble stave. There is ink leeching though some of the pages making notes difficult to read.

Sonata a 5

Scored for 2cnto/fl 2vl bc

Notation in parts – 5 parts found online

http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=2364

Main Hand: H456

Comments:

Trumpet part looks like the handwriting of GD.

Cornetto/Flute parts on the same score as another anonymous work; Sonata a 6 – #97 (Düben Catalogue Number: imhs 011:017)

The clarin/cornet parts of Sonata a 6 have the violin parts for Sonata a 5 written at the bottom of the page. The cornetto/flute parts for Sonata a 5 are written on the bottom of the cornetto/violin parts of Sonata a 6.

Comments:

Original genre is a sonata

Klarin/Cornet part looks like GD handwriting.

The cnto/vl and klarin/cornet parts written on the same score as another anonymous piece; Sonata a 5 #96 (Düben Catalogue Number: imhs 011:017). Cornetto/Violin parts almost exactly the same as the klarin/cornet parts except the cornetto parts start 8 bars after the klarin parts.

Sonatella a 5

Scored for 2cnto 3trb b

Notation in parts – 17 parts found online

http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=2390

Main Hand: GD

Comments:

Original genre is a sonatella.

There are four exemplars of each part. In all cornetto parts every second page of each exemplar, a strike-through of the entire page appears. Very similar to the anonymous suite in the catalogue #99 (Düben Catalogue Number: imhs 011:026d). These cornetto parts only use note values of crotchets or longer. The first cornetto part is written in the middle to upper register and the second part in harmony with the first in the middle register of the stave. Work is in two repeated sections with parts written in mainly stepwise motion.

Suite
Scored for 2cnto 2trb fag/b bc
Notation in parts – 13 parts found online
http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=2408

Main Hand: GD

Comments:
There are four exemplars of each part. Some of the exemplars are labeled online differently to
what is penciled on the part. Ex 1 of Cornetto 1 page 1 has what looks like two different
handwriting styles on it. Cornetto 2 page 1 ex 2 the second section is written in tablature.

Und alles Volk sprach Glück dem König (1681-85)

Scored for 2S A B 2vl 3vla 2trba bc

Notation in parts – 11 parts found online

http://www.musik.uu.se/duben/presentationSource.php?Select_Dnr=2018

Main Hand: GD

Language: German

Comments:

Written for the original feast Neujhaires wunsh

Headings on the parts sometimes say 4 viole, sometimes 5 viole.

Trombetta parts only used for the last ritornello with their music notated on the violin 1 and violin 2 parts. Two short 4-bar phrases repeated in the middle register of the stave.
